McRent

THE SMART WAY TO RENT MOTORHOMES.

Europe's biggest motorhome rental company

Vehicles and prices 2022

Vehicle overview

VANS

The Vans are flexible, compact and perfect for a short trip up to four people. They have a kitchenette, but no bathroom with shower and toilet.

CAMPERVAN

In small space camper vans offer the same comfort as a motorhome. Models with a pop-up roof have space for up to four people

SEMI-INTEGRATED

Semi-Integrated vehicles are elegant and manoeuvrable, what makes them the ideal vehicle for a city trip for up to four travellers with or without a pull-down bed

FULLY-INTEGRATED

Lots of space to recover from daily life and to relax with a larger living area what makes them perfect for a longer trip with up to four people

OVERCABS

The classic motorhome design offers additional sleeping berths above the driver’s cab and space for up to six people

Vehicle Groups

ERWIN HYMER GROUP

All of our motorhomes are fabricated by one of Europe's finest motorhome manufacturers and Erwin Hymer Group partners like Dethleffs, Sunlight, Crosscamp, Hymer, Bürstner, LMC and Etursco.

URBAN GROUP

Our Urban Group is ideal for a short trip. The side and driving feeling of the campervan is similar to a van. Campervans are smaller than motorhomes but have a lot of storage space. The vehicles are perfect for active travellers who want to travel a lot at the holiday destination. Depending on the model, they offer space for two or four people.

COMPACT GROUP

Our Compact Group is ideal for your first holiday in a motorhome. The compact side of the semi-integrated or integrated vehicles makes them ideal for a city trip. The vehicles are manoeuvrable and can be easily manoeuvred through narrow alleys. Ideal for two people or in the case of the integrated motorhomes with a pull down bed above the driver's cap for up to four people.

Vehicle Groups

FAMILY GROUP

Our Family Group is ideal for families. The vehicles offer more space for cooking, playing or sleeping. The Family Standard group offers room for four people thanks to the pull-down-up bed above the seating group. The overcab models have room for up to six people with a sleeping area above the driver's cab and the conversion of the seating group. So the family holiday can start.

COMFORT GROUP

Our Comfort Group is more comfortable with luxury motorhomes. The greater sense of space makes the motorhomes ideal for longer journeys and stays with up to four seats and beds. They provide room to rest, relax and just enjoy your motorhome holidays. Integrated motorhomes offer a lot of space due to the integration of the driver´s cabin.

PREMIUM GROUP

Our Premium Group offers plenty of space to relax and a lounge area. The motorhomes are equipped with air-conditioning and satellite system on request. With around eight meters in length are the motorhome ideal for longer trips or if you want to stay at the same place. The overcabs modes are ideal for up to six people.

Category Urban
